

JOB OPPORTUNITY

Lubambe Copper Mine is located within the Greater Konkola Area of the Zambian Copperbelt and consists of a large – scale mining license covering an area of approximately 228 square kilometres.

Completed and commissioned in 2012, Lubambe is an underground operation supported by a shaft and decline access with a 2.5 million tonne per annum capacity ore concentrator. The mine's current depth is 500 meters producing a high-grade copper concentrate which is then treated at Zambian smelters.

The mine currently employs 1,000 direct employees and a further 1,400 contractors. It places the highest priority on safety with a world class safety system.

Supporting local communities and suppliers is a key business focus of the mine.

EMR Capital owns an 80% controlling interest in Lubambe while ZCCM-IH owns 20%.

The Mine seeks to employ an experienced and qualified individual in the following position:

SENIOR PRODUCTION GEOLOGIST (x1)

This position reports to the Geology Superintendent

Core Purpose of the Position

The primary purpose of this role is to be responsible for all production geology related activities of the mine.
